

PRIYANKA DAS

Operations Analyst | Business Analyst | Operations Management

Bengaluru, India • +91 91538 60376 • priyankaaadas3002@gmail.com • linkedin.com/in/priyankadas2003 • github.com/priyankaaa3002

PROFESSIONAL SUMMARY

Operations professional running a high-volume admissions pipeline of 8,000+ weekly counselling bookings across 145+ cohorts and 20+ IIT/IIM partner programmes at Masai; promoted from intern to Operations Manager L3 in three months. Strong in Advanced Excel and Metabase for data validation, funnel tracking and operational reporting, with hands-on SQL and Power BI applied in an independent analytics project. Targeting Operations Analyst / Business Analyst roles.

CORE SKILLS

Advanced: Excel (PivotTables, XLOOKUP/VLOOKUP, nested logic, conditional formatting, data cleaning, trackers and dashboards), Metabase, MS Office

Working Knowledge: SQL (SELECT, JOINS, GROUP BY, aggregate/window functions, data-quality validation); Power BI (data modelling, live database connections, visuals)

Business Analysis: Funnel and conversion analysis, KPI tracking, process mapping, data validation and reconciliation, root-cause analysis, MIS and stakeholder reporting, documentation and SOPs

Operations: Workflow management, capacity planning and workload allocation, scheduling, SLA and escalation management, lead lifecycle management, exception handling, stakeholder coordination

PROFESSIONAL EXPERIENCE

Operations Manager L3, Masai

May 2026 – Present

- Manage the pre-counselling operations pipeline for 8,000+ weekly candidate slot bookings (18,000+ booking records per two-week cycle) across 145+ live cohorts spanning 20+ IIT, IIM and global partner programmes.
- Validate and reconcile booking data in Metabase against live intake, updating stage-level operational checks as new bookings land so candidates are accurately tracked across the application, qualifier-test/SOP, slot-booking and counselling stages.
- Allocate reminder- and assisted-booking call workloads to a team of 80+ counsellors using booking volume, slot density (95+ distinct slot times in peak weeks) and no-show risk, balancing team capacity against same-day session coverage.
- Schedule pre-session reminder communications timed 30 minutes ahead of each counselling slot across English, Tamil and Telugu cohorts to lift attendance and reduce no-shows.
- Report selection outcomes for 4,900+ evaluated applications (approx. 94% selection rate), surfacing funnel drop-offs and unbooked-lead pockets to programme stakeholders, and own exception handling for deadline-extension and rescheduling requests.
- Conduct ad-hoc weekly analysis on booking and lead trends at leadership's request to inform decisions on staffing, scheduling and process adjustments.
- Track pre-counselling call outcomes – confirmed joins, no-pickups, reschedules and payment conversion – to surface funnel drop-off points and inform follow-up strategy.

Operations Intern, Masai

Feb 2026 – Apr 2026

- Sole owner of inbound email queries and escalations across 20+ institute-branded programme inboxes spanning IIT Patna, IIT Roorkee, IIT Guwahati, IIT Hyderabad, IIM Trichy, IIM Mumbai, XLRI, BITSOM, NMIMS and PwC Academy.
- Triaged and resolved candidate queries on eligibility, fees, assessments and slot booking; routed complex escalations to the correct programme owners and tracked every case to closure.
- Maintained query logs and identified recurring issue themes, standardising responses to cut repeat escalations and improve first-response turnaround; promoted to Operations Manager L3 within three months.

Market Research Intern, TheForexFace

Oct 2024 – Dec 2024

- Assessed client financial health using ratio analysis across creditworthiness, debt-to-equity and cash reserves to support advisory recommendations.
- Analysed import/export transaction data to quantify foreign-exchange exposure, and recommended hedging approaches based on currency risk, market volatility and client objectives.

PROJECTS

Customer Support Ops & SLA Analysis (SQL, Power BI, Excel) — github.com/priyankaaa3002/support_operations_analytics

Modelled a 3-tier support-ticket escalation funnel in PostgreSQL; SQL analysis found escalated tickets breach SLA at **2x the rate** of non-escalated tickets and night-shift response time **nearly doubles** versus daytime, visualised in a Power BI dashboard **connected live to the PostgreSQL database**, with one data-integrity check cross-validated independently in Excel.

Three-Statement Financial Model, Hindustan Unilever Ltd. (Excel)

Built historical and common-size statements with ratio analysis, forecast sales, EBITDA and EPS, computed WACC and ran beta regression to support valuation.

NIFTY Personal Care Index Construction (Excel)

Constructed market-cap-weighted, free-float and equal-weighted indices, then benchmarked sector performance and trends.

EDUCATION

Bachelor of Business Administration (Finance & Human Resource) | 2022 – 2026

Acharya Institute of Management and Sciences, Bengaluru
